## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 – 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Ebinuma (5,261,490).

With respect to claims 1 – 3 and 5: Ebinuma teaches in column 13, line 38 – column 14, line 3 and in the abstract a method for recovering methane from a subterranean methane hydrate field comprising the step of: injecting a gaseous stream comprising carbon dioxide into said methane hydrate field, displacing methane in said methane hydrate field, forming carbon dioxide hydrate and displaced methane; and collecting said displaced methane.

Ebinuma teaches the recovery of natural gas, which is 85% methane, 10% ethane, and the balance being made up of propane, butane, and nitrogen. This is from Lewis, Richard J., *Hawley's Condensed Chemical Dictionary*, Fourteenth Edition, 2001.

With respect to claims 4 and 6: Ebinuma teaches in column 13, line 38 – column 14, line 3 and in the abstract a method wherein said subterranean methane hydrate field is disposed at a sea bottom.
